## EDUCATION

### University of Illinois Urbana-Champaign

*Bachelor of Science in Integrative Biology, Minor in Electrical Engineering*

Champaign, IL

December 2024

## EXPERIENCE

### Student Researcher

Jan 2024 - May 2024

*Illinois Natural History Survey - Tan Lab of Biodiversity Genomics*

Urbana, IL

- Engaged in a phylogenomic study focusing on homology and ultraconserved elements within zebrafish genomes, enhancing understanding of evolutionary relationships.
- Managed and optimized bioinformatics workflows for high-throughput sequencing data analysis, involving quality control with FastQC, data trimming with BBDuk, and sequence assembly using SPAdes, Phyluce, and BUSCO to enhance phylogenomic reconstruction accuracy.
- Contributed to developing and refining a streamlined protocol for phylogenomic data extraction and analysis, while actively engaging in lab meetings to address technical challenges and strategize research methodologies.

### Student Researcher

Aug 2023 - Dec 2023

*Illinois Natural History Survey - Tan Lab of Biodiversity Genomics*

Urbana, IL

- Conducted comprehensive research on morphological diversity in Sisoridae and Amphilidae catfish adaptation to fast water environments.
- Utilized Geometric Morphometrics in R Studio for precise quantification of body shape differences. Applied PCA and GPA statistical methods to explore correlations and variations.
- Presented comprehensive results, highlighting significant differences in shape disparity in relation to adhesive organ presence. Provided insights into the evolutionary constraints on body shape in fastwater-adapted catfishes.

### Student Researcher | [Metabolomics & Proteomics Core Facilities](#)

June 2023 – Aug. 2023

*Roy J. Carver Biotechnology Center*

Urbana, IL

- Developed an untargeted metabolomics pipeline for post-processing, Quality Assurance/Quality Control, and data analysis.
- Provide support for data processing on LC-MS Untargeted Metabolite Profiling.
- Refine untargeted analyses to support various biomedical studies at the Carver Metabolomics Core.

### SLC Conference Planning Committee Volunteer | [IEEE](#)

Jan 2022 - Jan 2023

*The Institute of Electrical and Electronics Engineers*

Chicago, Illinois, United States

- Assisted in organizing and managing conference logistics, scheduling, and coordinating with stakeholders.
- Worked with Midwest Region 4 Committee members to develop and implement strategies for a successful conference.
- Proactively identified and addressed potential challenges during the planning process.

### SPIN Research Intern | [The NEAT Project v4.0](#)

Aug. 2021 – Sep. 2022

*National Center for Supercomputing Applications*

Champaign, IL

- Designed NGS toolkit for HAL Cluster, increasing Parallel Processing speed by 7%, and streamlined Empirical Mutation and Sequencing Models. Revised bash scripts and input flags.
- Managed genomic pipeline (FASTA, FASTQ, SAM, BAM, VCF) and implemented relevant Bioinformatics algorithms: Smith-Waterman, BLAST, Localized String Alignment.
- Presented HPC for Computational Genomics findings at the NCSA Exhibition during UIUC's Engineering Open House and the REU FoDOMMaT/SPIN Showcases.

### Outreach Committee Lead | [Pulse 2022](#)

Aug 2021 - Aug 2022

*Department of Electrical and Computer Engineering*

Champaign, Illinois, United States

- Coordinated materials and event location logistics with the ECE department during COVID-19.
- Develop Software to exhibit Computer Engineering principles: C++ Data Structures, Polymorphism, Command-Line Interface, Stack/Heap Memory Management, Address Space, etc.
- Design Hardware activities to guide freshmen through simulated Electrical Engineering projects: series vs parallel circuits, Pulse Width Modulation motor control, Thermistor and LDR implementation

### Phys 211 Experienced Learning Assistant

Jan 2021 - Dec 2021

*Loomis Laboratory Of Physics*

Urbana-Champaign Area

- Continued the study of Physics pedagogy by instructing PHYS 211 labs, providing guidance to 30+ students.
- Answered student questions, clarified critical lecture material, and built/corrected IOLab setups.
- Developed advanced teaching, communication, and leadership skills through interactions with students and seminar presentations alongside lab staff.

### IOT Research Lab Assistant | [Caesar Lab](#)

Jan. 2021 – Jun. 2021

*Coordinated Science Laboratory*

Urbana, IL

- Remodeled a Reinforcement Learning System intended for UAV-Assisted Emergency Response.
- Upgraded the fully-distributed communication environment for USAF usage.
- Implemented communication trees via Python Message Passing Interface (MPI) standard in under 6 months.

## Research Intern | [Drs. Spitalnik, Hod, La Carpia](#)

June 2018 - Aug 2018

*Columbia University Medical Center - Lab of Transfusion Biology*

*New York, NY*

- Investigated the effects of transfusional iron overload on gut microbiota due to intravenous infusion.
- Conducted initial studies with a mouse model to retrieve data on iron-deficient erythropoiesis in blood donors and red blood cell recovery after transfusion of hematopoietic red blood transplant.
- Utilized basic Spearman Correlation meta-analysis of bacteria communities, performed blood analysis tests, and used Flow Cytometry to collect sample cell data.

## PROJECTS AND INVOLVEMENT

---

### AM Radio | *ECE 210*

Jan. 2022 – May 2022

- Construct a functioning AM Radio using a Superheterodyne Receiver; Convert digital .wav audio input to analog 3.5mm speaker output
- Utilize Fourier Transforms to convert Time domain signals to Frequency domain responses

### Virtual Gloves | [ECE 120 Honors](#)

Jan. 2021 – May 2021

- Develop a “virtual keyboard” by moving fingers attached to flex sensors and provide haptic feedback
- Collect data from flex resistors in Arduino Studio and use C++ to send output confirmations to LEDs

**Membership:** IEEE@UIUC, iRobotics, MRDC, Vex Robotics, ACM, SIGPWNY

## LEADERSHIP

---

### Conferences

- NCSA Letter of Outstanding Student Leadership Recognition (2023-2024)
- NCSA 2nd Annual Student Research Conference - Planning Committee, Panel Moderator, and Industry Chair (2024)
- ACMG Annual Clinical Genetics Meeting (Metro Toronto Convention Center) - Attendee, 2024
- ISPD 28th International Conference on Prenatal Diagnosis and Therapy (Westin Copley Place, Boston) - Attendee, 2024
- NCSA Student Research Conference - Planning Committee and Panel Moderator (2023)
- IEEE Nexus Region 4 Student Leadership Conference - Conference Planning Lead (2022-2023)

### Presentations

- University of Illinois - Undergraduate Research Symposium (2024)
- National Center for Supercomputing Applications - SPIN Lightning Talks (2021-2022)
- National Center for Supercomputing Applications - Engineering Open House (2021)

### Teaching

- ECE PULSE - Outreach Committee Lead (2022)
- Loomis Laboratory Of Physics - “Expert Learning Assistant” for Mechanics (2021)

### Volunteering

- De Dilse Charitable Inc. - Co-Founder and Lead Volunteer (2019-2022)
- Kaplen Jewish Community Center on the Palisades - Senior Science Counselor (2019)
- American Wheat Mission - Volunteer (2018)

## TECHNICAL SKILLS

---

**Lab Equipment:** Flow Cytometer, Clinical Benchtop Centrifuge, ThermoFisher Q-Exactive Mass Spectrometer

**Bioinformatics:** BLAST+, Smith-Waterman, Biopython, Chromosome Analysis Suite (ChAS), Rstudio, OMIM, UCSC Genome Browser, Ensembl, Illumina BaseSpace - DRAGEN Enrichment

**Analytics Tools:** Google Cloud (SDK, Analytics, BigQuery), HPC Clusters (Delta, Blue Waters)

**Developer Tools:** Git, GitHub, GitLab, Docker, VirtualBox, Kernel-based Virtual Machines (KVMs), Digital Ocean Droplets

**Programming Experience:** Bash, C/C++, CUDA, Python MPI, R

**Hardware and Electronics:** Breadboards, Raspberry Pi (Zero/3b/4), Arduino UNO, Intel MAX 10 FPGA

**Electrical Engineering Fundamentals:** Oscilloscope, Network Analyzer, RLC circuits, Operational Amplifiers, Band-Pass Filters, Quartus Prime utility, ModelSim utility, SystemVerilog
